KENZ Hypermarket covers the land area of 160,000 Square feet and is situated at the heart of Hamidiya, Ajman. Their Hypermarket is transcending in actuating worldwide customers on a large scale every day. Their shop is purpose built and has sufficient capability to provide security and integrity of products. Moreover, the team of supply chain analysts are committed to managing inventory levels and ensuring the availability of products at all the times.

The Retail Add-on helps Retailers transform through the complete hypermarkets and supermarkets to meet the industry best practices to achieve retailers' need and right planning tools at their disposal which can be seamlessly integrated with SAP Business One.

This is a Mobile Application which can be installed in Android Tabs. Through this Mobile App Customer can self-check the price and the promotions running on product at the store. Also, customer can view their Loyalty points by scanning their Loyalty card. In the Idle time it can also display the promotions banners and videos.

This Warehouse Management Mobile (iWMS) Application is available for Both windows and Android. This can be installed in the Portable Data Terminal (PDT) Devices which will have in-built barcode scanner. Through this application all the warehouse related activities like Purchase and Inventory can be managed.

This is a Rewards Mobile Application which is available for Android and iOS. It has the following features.

- New Customer Registration.
- Existing Customer Login.
- Loyalty Points Info.
- Promotions Display.
- Suggestions and Feedback Screen.
- Integrated with SAP B1.
