Noble Freight Services LLC is a logistics company that deals with Logistics and is present in Dubai.

Logistics billing add-on commonly used for 3PL (Third Party Logistics) customers. This add-on automates a big part in 3PL Concept. This add-on will automatically generate the invoice for the space utilized by customer monthly. Invoice will give a clear picture of all the Incoming and outgoing documents with space utilized. Apart from space utilization bills, system will also automatically generate bills for the services provided to the customer.

Customer Portal is a web-based application developed for 3PL Customers. Through this portal we are providing the customer to directly upload their Sales Order and purchase order and can easily track the status. Through the dashboard provided customer can check their live status of Jobs, Open Purchase orders & Sales Orders, Inventory details etc.

Batch and Bin Automation add-on commonly used for customers having a warehouse management system. This add-on will automate the bin and batch allocation for an item which comes in and goes out from the inventory. This will provide the customer an effortless and clear tracking of their items.
